Zero Trust Orchestrator

Cybersecurity Challenges

Zero Trust Adoptation

According to Gartner, more than **50%** of organizations implementing ZT will fail to realize the benefits.
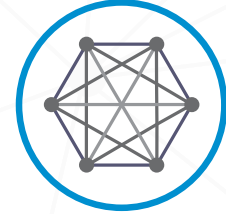

Insecure Configurations

According to Center for Internet Security (CIS), default Windows Server Benchmark scores are only **21%**.

Lack of Visibility and Process Management

Customers typically discover up to **35%** more assets than they think they have. You can't secure what you can't see.

Complexity and Talent Shortage

Lots of security products require lots of cybersecurity experts. Today, there is a need for more han **5 Million** experts in the world.
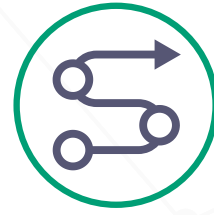

SecHard Solutions

Zero Trust Orchestrator

Implementing and orchestrating 5 Protection Visibility Controls of Zero Trust.

Security Hardening and Remediation

Increasing hardening scores from **21% to 95%+** automatically and effortlessly.

Cybersecurity Process Automation

Robotic Process Automation **(RPA)** to get compliant with ZT, NIST CSF, GDPR, ISO 27001, etc.

Cybersecurity Consolidation

Consolidated cybersecurity technologies to strengthen **cyber resilience** and help overcome **talent shortage**.
